

Typo3 Kurzinstallation

1. Dummy und Source Paket von Typo3 herunterladen
2. Kopiere die Dateien in dein Root-Verzeichnis des Servers, und zwar den **Inhalt** des heruntergeladenen src-Ordners. Aber **NICHT** den gesamten Ordner.
3. Kopiere den **Inhalt** des dummy-Ordners ebenfalls in dein Root-Verzeichnis des Servers.
4. Erstelle im Ordner typo3conf eine Datei mit dem Namen ENABLE_INSTALL_TOOL (ohne Dateieindung).
5. Gib deine Internetadresse im Browser ein. Du solltest dann automatisch in das Install-1-2-3-4-Tool weitergeleitet. Wenn die unten stehende Fehlermeldung kommt, fehlt die in Punkt 4 beschriebene Datei oder ist falsch.

6. Nun nach den folgenden Bildern die Installation zu Ende bringen. Für die Datenbankverbindung musst du die folgenden Angaben bereit halten.

- Datenbank-Name
- Benutzername für die Datenbank
- Passwort für die Datenbank
- Host der Datenbank (meisten localhost)

Installing TYPO3 4.4

1 2 3

Connect to your database host

If you have not already created a username and password to access the database, please do so now. This can be done using tools provided by your host.

Installing TYPO3 4.4

1 2 3

Select database

You have two options:

- Create a new database (recommended):**

Enter a name for your TYPO3 database.

- Select an EMPTY existing database:**

Any tables used by TYPO3 will be overwritten.

Installing TYPO3 4.4

1 2 3

Congratulations!

You have completed the basic setup of the TYPO3 Content Management System. Choose between these options to continue:

- [Configure TYPO3](#) (Recommended)
This will let you analyze and verify that everything in your installation is in order. In addition, you can configure advanced TYPO3 options in this step.
- [Visit the frontend](#)
- [Login to the backend](#)
(Default username: *admin*, default password: *password*.)

Important Security Warning

An unsecured Install Tool presents a security risk. Minimize the risk with the following actions:

- Change the Install Tool password.
- Delete the ENABLE_INSTALL_TOOL file in the /typo3conf folder. This can be done manually or through User tools > User settings in the backend.
- For additional security, the /typo3/install/ folder can be renamed, deleted, or password protected with a .htaccess file.

[Change the Install Tool password here](#)

7. Nun die Datei ENABLE_INSTALL_TOOL wieder löschen.

8. Eingang Backend: <http://www.Domain.ch/typo3/>

Login: admin

Passwort: password

9. Eingang Frontend: <http://www.Domain.ch>

Abschlussbemerkungen

Das Standardpasswort für das Install-Tool: joh316

Dieses Passwort muss **nach** der fertigen Installation geändert werden. Mach das aus dem funktionierenden Backend raus.
